December 2009

Symbol: NEARX CUSIP: 911476-85-1
Inception Date: 12/4/90

About the Fund

The Near-Term Tax Free Fund invests in municipal bonds with relatively short maturity. The fund seeks to provide tax-free monthly income and stability by investing in debt securities issued by state and local governments from across the country.

Fund Objective

The Near-Term Tax Free fund seeks current income that is exempt from federal income tax and also seeks preservation of capital.

Fund Strategy

Under normal market conditions, the Near-Term Tax Free Fund invests at least 80 percent of its net assets in investment grade municipal securities whose interest is free from federal income tax, including the federal alternative minimum tax. The Near-Term Tax Free Fund will maintain a weighted-average portfolio maturity of five years or less.

The fund's portfolio team applies a two-step approach in choosing investment, beginning by analyzing various macroeconomic factors in an attempt to forecast interest rate movements, and then positioning the fund's portfolio by selecting investments that it believes fit that forecast.

Tax-exempt income is federal income tax free. A portion of this income may be subject to state and local income taxes, and if applicable, may subject certain investors to the Alternative Minimum Tax as well. Each tax free fund may invest up to 20% of its assets in securities that pay taxable interest. Income or fund distributions attributable to capital gains are usually subject to both state and federal income taxes. Bond funds are subject to interest-rate risk; their value declines as interest rates rise.

There is no guarantee that the investment objectives will be met. ¹The Barclays Capital 3-Year Municipal Bond Index is a total return benchmark designed for long-term municipal assets. The index includes bonds with a minimum credit rating BAA3, are issued as part of a deal of at least \$50 million, have an amount outstanding of at least \$5 million and have a maturity of 8 to 12 years. ²Portfolio holdings will change. ³Fund assets can include, but are not limited to, bonds, cash, receivables, pre-paid expenses and other miscellaneous assets. Fund composition represents key components only and should not be considered a complete financial picture of a fund's assets. Standard deviation is a measure of the dispersion of a set of data from its mean. The more spread apart the data, the higher the deviation. Standard deviation is also known as historical volatility. For each fund with at least a three-year history, Morningstar calculates a Morningstar RatingTM based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The Lipper ratings are subject to change every month and are based on an equal-weighted average of percentile ranks for the Preservation and Expense metrics over three-, five-, and ten-year periods (if applicable). The highest 20% of funds in each peer group are named Lipper Leader or a score of 5, the next 20% receive a score of 4, the middle 20% are scored 3, the next 20% are scored 2, and the lowest 20% are scored 1. Near-Term Tax Free Fund, in Lipper's Short-Intermediate Municipal Debt classification, received the following ratings for the 3-, 5-, and 10-year periods, respectively: Preservation (in Fixed Income asset class): 5 (4127 funds), 5 (3625) and 5 (2421). Expense: 5 (16 funds), 5 (16 funds) and 5 (10 funds). Lipper ratings are not intended to predict future results, and Lipper does not guarantee the accuracy of this information.
