## Fund Strategy

Under normal market conditions, the World Precious Minerals Fund will invest at least 80% of its net assets in common stock, preferred stock, convertible securities, rights and warrants, and depository receipts of companies principally engaged in the exploration for, or mining and processing of, precious minerals such as gold, silver, platinum group, palladium and diamonds. The fund focuses on selecting junior and intermediate exploration companies from around the world.

The chart illustrates the performance of a hypothetical \$10,000 investment made in the fund during the depicted timeframe. Figures include reinvestment of capital gains and dividends, but the performance does not include the effect of any direct fees described in the fund's prospectus (e.g., short-term trading fees) which, if applicable, would lower your total returns.

The Adviser for the World Precious Minerals Fund has contractually limited total fund operating expenses (as a percentage of net assets) to not exceed 1.50% (exclusive of acquired fund fees and expenses of 0.02%) on an annualized basis through September 30, 2009.
