

All American Equity Fund (GBTFX)

November 2009

Symbol: GBTFX CUSIP: 911476-60-4
Inception Date: 3/4/81

About the Fund

The All American Equity Fund invests in the growth of America by seeking "All American" companies with the best prospects for growth. Offering the opportunity to invest right here at home, often in well-recognized names, the fund invests at least 80 percent of its assets in "All American" companies. The portfolio management team uses a variety of investment strategies to select companies identified as having superior growth, profitability and quality relative to companies in the same industry.

Fund Objective

The All American Equity Fund seeks long-term capital appreciation.

Fund Strategy

Under normal circumstances, the fund will invest at least 80 percent of its assets in securities defined as "All American." These securities can include common stock, preferred stock, convertible securities, rights and warrants and depository receipts.

Portfolio Team

Frank Holmes, Chief Investment Officer
Years of Experience: 30

John Derrick, CFA
Years of Experience: 14

Romeo Dator, CFA

Potential Risk/Reward

Low High

All information is unaudited and, unless otherwise indicated, is as of 11/30/09

Growth of \$10,000 from 09/30/2004 to 09/30/2009

The chart illustrates the performance of a hypothetical \$10,000 investment made in the fund during the depicted time frame, compared to its benchmark index. Figures include reinvestment of capital gains and dividends, but the performance does not include the effect of any direct fees described in the fund's prospectus (e.g., short-term trading fees) which, if applicable, would lower your total returns.

Gross expense ratio as stated in the most recent prospectus. Capped expense ratio is a voluntary limit on total fund operating expenses (exclusive of any acquired fund fees and expenses, performance fees, taxes, brokerage commissions and interest) that U.S. Global Investors, Inc. can modify or terminate at any time. Performance data quoted above is historical. Past performance is no guarantee of future results. Results reflect the reinvestment of dividends and other earnings. Current performance may be higher or lower than the performance data quoted. The principal value and investment return of an investment will fluctuate so that your shares, when redeemed, may be worth more or less than their original cost. Performance does not include the effect of any direct fees described in the fund's prospectus (e.g., short-term trading fees of 0.10%) which, if applicable, would lower your total returns. Obtain performance data current to the most recent month-end at www.usfunds.com or 1-800-US-FUNDS.

Morningstar 5-year Rating™

Among 1515, 1515, 1255 and 653 Large Growth funds, the All American Equity Fund earned 3 stars, 3 stars, 4 stars and 2 stars for the overall, 3-, 5- and 10-year periods 9/30/09. Ratings are based on risk-adjusted return. The Overall Morningstar Rating for a fund is derived from a weighted-average of the performance figures associated with its three-, five- and ten-year (if applicable) Morningstar Rating metrics. Past performance does not guarantee future results.

Please consider carefully a fund's investment objectives, risks, charges and expenses. For this and other important information, obtain a fund prospectus by visiting www.usfunds.com or by calling 1-800-US-FUNDS (1-800-873-8637). Read it carefully before investing. Distributed by U.S. Global Brokerage, Inc.

There is no guarantee that the investment objectives will be met. ¹The S&P 500 Stock Index is a widely recognized capitalization-weighted index of 500 common stock prices in U.S. companies. ²Portfolio holdings will change. ³Fund assets can include, but are not limited to, equities, bonds, cash, receivables, pre-paid expenses and other miscellaneous assets. Fund composition represents key components only and should not be considered a complete financial picture of a fund's assets. Beta is a measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole. Information Ratio is the ratio of expected return to risk, as measured by standard deviation. Information Ratio is used to measure portfolio management's performance against a benchmark. Standard deviation is a measure of the dispersion of a set of data from its mean. The more spread apart the data, the higher the deviation. Standard deviation is also known as historical volatility. For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) 09-834
