All opinions expressed and data provided are subject to change without notice. Some of these opinions may not be appropriate to every investor. Foreign and emerging market investing involves special risks such as currency fluctuation and less public disclosure, as well as economic and political risk. Because the Global Resources Fund concentrates its investments in a specific industry, the fund may be subject to greater risks and fluctuations than a portfolio representing a broader range of industries. There is no guarantee that factors described above will result in higher energy prices. 13-199
