Expense ratios as stated in the most recent prospectus. The expense cap is a voluntary limit on total fund operating expenses (exclusive of any acquired fund fees and expenses, performance fees, taxes, brokerage commissions and interest) that U.S. Global Investors, Inc. (the "Adviser") can modify or terminate at any time, which may lower a fund's yield or return. In addition, the yields and returns for the U.S. Government Securities Ultra-Short Bond Fund include the effects of additional voluntary waivers of fees and reimbursements of expenses by the Adviser, including waivers and reimbursements to maintain a minimum net yield for the fund. The Adviser can modify or terminate these arrangements at any time. Performance data quoted above is historical. Past performance is no guarantee of future results. Results reflect the reinvestment of dividends and other earnings. For a portion of periods, the fund had expense limitations, without which returns would have been lower. Current performance may be higher or lower than the performance data quoted. The principal value and investment return of an investment will fluctuate so that your shares, when redeemed, may be worth more or less than their original cost. Performance does not include the effect of any direct fees described in the fund's prospectus which, if applicable, would lower your total returns. Performance quoted for periods of one year or less is cumulative and not annualized. Obtain performance data current to the most recent month-end at [www.usfunds.com](http://www.usfunds.com) or 1-800-US-FUNDS.

Bond funds are subject to interest-rate risk; their value declines as interest rates rise.
